CONNECT ■ EMPOWER PEOPLE ■ CUT COSTS ■ RAPIDLY RESPOND

Did you know that employees get most of their relevant information directly from other people?

Have you thought about the costs associated with employees searching for information?

Ever consider how much knowledge is lost when an individual leaves an organization unexpectedly?

Please join **CyberAdvisors** for an Introduction to **Microsoft SharePoint Portal Technology** and how to successfully build business solutions using it.

Discover how to:

- Connect and Empower your people
- Partner organizations to work together
- Cut Costs with a Unified Infrastructure
- Rapidly Respond to Business Needs

If you have either thought about deploying SharePoint or considered upgrading to 2010, this seminar, designed for business and technology decision makers and professionals is the one for you!
